Gary E. Moore, Moore Computing Services, Inc.

Gary Moore has more than 30 years of statistical programming experience. He was working with the FDA on the development of statistical methods for risk assessment and survival analysis when he was seduced by the dark side into becoming an independent consultant. He has been a consultant working remotely for almost 25 years. Since then he has worked with large and small pharmaceutical companies on just about every aspect of clinical trial reporting. His current experience in infectious diseases and submission requirements is making him a good candidate for sleep deprivation studies.

Welcome to Eighth Edition Unix. You may be sure that it
is suitably protected by irrevocable licences, contractual agreements,
living wills, and trade secret laws of every sort. A trolley car is
certain to grow in your stomach if you violate the conditions
under which you got this tape. Consult your lawyer in case of any doubt.
If doubt persists, consult your lawyers.

Please commit this message to memory. If this is a hardcopy terminal,
 tear off the paper and affix it to your machine. Otherwise take
a photo of your screen. Then delete /etc/motd.

Thank you for choosing Eighth Edition Unix. Have a nice day.

Sometimes late at night I dig a hole in the backyard
to keep my nosey neighbour’s guessing
